

## BUZZ BRAIN EXERCISE-021

This exercise will challenge your critical thinking and creativity.

The grid contains 12 numbers.

Create nine equations using multiplication and or division, where the nine numbers appear in your third column as the answers to your equation.

Example-

$$2 \times 8 = 16$$

2 is in first column, 8 is in the second column and 16 is in the third column as the answer.

### THE CHALLENGE

One of your columns must contain the numbers one thru nine in any order.

No number can appear in any column more than once.

40	10	21	8	16	2	12	72	4
----	----	----	---	----	---	----	----	---
