

BUZZ BRAIN EXERCISE-040-Endurance

This is my first exercise using two-digit numbers.

It is a real test of endurance, I intended it to be a warm-up exercise but unfortunately it turned out to be a much more difficult exercise than I had anticipated.

There are two grids; the first grid contains a list of numbers.
 Arrange the numbers in the second grid so that the tens and ones sub-column contains the number one thru nine in any order.

The exercise is not as easy as it looks.

The exercise is designed to have at least nine numbers repeated.

ON this first attempt the only rule is to see what is the lowest number of repeat numbers you use to complete the exercise.

The exercise is designed to have be some repeat numbers.

The rules will change in subsequent exercises.

12	21	31	41	51	61	71	81	91
13	23	32	42	52	62	72	82	92
14	24	34	43	53	63	73	83	93
15	25	35	45	54	64	74	84	94
16	26	36	46	56	65	75	85	95
17	27	37	47	57	67	76	86	96
18	28	38	48	58	68	78	87	97
19	29	39	49	59	69	79	89	98
??	??	??	??	??	??	??	??	??

12	31	23	54	47	65	76	89	98
21								
35
